### **DETAILED ACTION**

The application has been assigned to a new examiner who will be addressing the features of the dependent claims of the invention. Plural species are present in this case requiring election as follows.

#### ***Election/Restrictions***

This application contains claims directed to the following patentably distinct species:

species as set forth by claims 3,4 drawn to a system/method having an inquiry feature;

species as set forth by claim 5,6 drawn to a system/method having a detection feature;

species as set forth by claim 7 drawn to a system/method having a re-access feature;

species as set forth by claims 3,4 drawn to a system method having an inquiry feature

species as set forth by claim 8 drawn to a system/method having a past transaction log;

species as set forth by claim 9 drawn to a system/method having a completion notice feature.

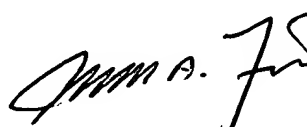

Art Unit: 3627

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1,20<sup>or</sup> generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Any inquiry concerning this communication should be directed to Joseph A. Fischetti at telephone number 571 272 6780.
